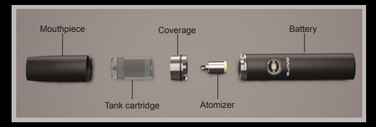
Safe Smoking

Ovale Elips C Series is a great new way to smoke safely.
From the very first time you pick the e-cigarette up, you feel the comfort of its slim body and light weight.
Designed to have a very natural grip and convenient to carry, Elips has a stylish yet discreet body a narrow silhouette measuring only 0.99 cm.
E-Cigarette users have been dreaming of a product with these features for a long time and Elips C Series is a great step in the right direction towards the perfect e-cigarette.

Assembling the Elips

Elips C Series is composed of a rechargeable lithium-ion battery, the elips atomizer and its coverage, a liquid Tank cartridge and the mouthpiece cap.
To assembly it, join the atomizer to the battery. Ensure that the Tank cartridge and the battery base are lined up correctly. Then place the mouthpiece cap over the Tank cartridge.



Warning:
Forcing parts together may cause damage to the e-cigarette.
To refill the Tank, just take out the mouthpiece and the cap, leave the atomizer into the battery.

Charging the battery

Elips C Series is powered by a 3.7v 360mAh lithium ion battery and it introduces a new smart charging system. You can charge Elips without disassembling your e-cigarette by plugging the USB charging cable into the base of the e-cigarette or you can simply place it into the personal wireless charging case thanks to the new Pass-Through charging system.

To charge the battery, plug the dedicated USB cable into the socket at the bottom of the battery. A red LED light will turn on to show the device is charging.
The Elips C Series battery has special microchips in it to prevent over charging. Wait for the battery to be full charged, when finished, it will flash and automatically turn off.
It takes approximately 100 to 150 minutes to charge. You can use Elips while it is charging, even if the charging time may be a bit longer.

Warning:

- Use only the dedicated USB cable provided in the kit for charging. Do not use other charging cables. This may damage the battery and may cause malfunctions.
- Use the high-power USB port on your computer to charge the battery. Low power USB ports will not charge the battery.
- Lithium-ion battery is an expandable item.Over time, its charging ability will gradually decrease. To improve the life of the battery, always charge it fully.

How to use

Assemble the product according to the description above.
Elips C Series has a removable battery which features an easy five click on/off protection system.
Press the LED button on the battery for the unit to work. When ready to start smoking, press the LED button and inhale. Then release it.
Pressing the LED button for too long may cause the product to fail due to excessive heat.

The correct way to separate the liquid tank cartridge

Elips C Series adopts the new tank system developed by Ovale with a capacity to hold 1 ml of liquid.
To separate the tank cartridge, hold it with the lid upright and gently pull down on the cartridge until it separates from the atomizer.

Changing the Liquids

Changing the liquids is easy with the Elips.
Simply separate the tank cartridge from the atomizer pin and inject the liquid directly into the cartridge through the hole. Please do not overfill.

How to start smoking

To begin smoking with the Elips C series, inhale slowly and smoothly while pressing the LED button.
You will feel the vapour flowing, into your mouth. Do not inhale too quickly.

Product management

Care should be taken with this product to ensure long life. Always wipe with a clean cotton cloth. Clean connections between the atomizer and the battery.
Be careful not to let any foreign material penetrate into the cartridge or the atomizer. Periodic replacement of the mouthpiece is recommended to maintain a good hygiene.

Battery
Use only genuine adapters when charging. Recharge fully before using. Do not keep in places that are too hot, humid or cold. Do not drop or jolt the device. Keep away from pets, children and sharp objects. To prevent accidental discharges, stores the battery in a pouch or the PCC.

Liquids
Always keep liquids in a cool dry place, away from direct sunlight or extreme cold temperature.

Atomizer
If you are experiencing severe heat when using this product, stop usingit and alllow time for it to cool down temporarily.
If the atomizer is dry when the product is used it may produce a burning smell. Therefore, always ensure there is enough liquids in the cartridge before using.

Mouthpiece cap
Liquids may enter your mouth during the smoking. This may happen as the remaining water steam in the cap cool down and returns to the liquid state again. Please clean out excess liquid from inside the cap. Do not drink liquids. It is not food.
If liquids get on your lips or in your mouth, rinse with clean water.

Precaution

Please use the product only after you have read the manual and understood the precautions.

- Do not use fingernails, knives or sharp objects on the tank cartridge and do not remove the protruding portion of the liquid tank cartridge cap. It may hole the cartridge and allows liquids to leak out of the tank.
- Separate the tank cartridge only when you need to refill liquids or change the cartridge. Removing it unnecessarily or too often could increase the size of the hole in the cartridge and cause leaks.

- When you are changing or refilling the tank cartridge, you may notice a thin film of liquid on the tank cartridge. This is the result of vapor cooling and returning back to liquid form as it passes by the atomizer. Simply wipe the excess liquid away with a tissue.
- Do not push the pin at the end of the cartridge. This could cause abnormal air flow or leaks.
- There is the risk of leakage from the cartridge if the e-cigarette is subjected to shocks, drops or violent movements. Be careful during the use. Keep your e-cigarette in a pouch or the Personal Charging Case(PCC).
- The sharp pin on the atomizer may cause injuries. Please be careful when separating the cartridge and the atomizer.

Guarantee

Warranty as to the law.
